CORE SOLUTION
Clinical Care Classification (CCC)

Fast-Track Care Planning in Epic
Implement the care planning and coding framework consistently approved by the Joint Commission

The Terminology of Choice for Care Plan Documentation

The **Clinical Care Classification (CCC) System** is recognized as the terminology of choice for documenting the essence of patient care in EHR systems. Developed by nursing informatics pioneer Dr. Virginia Saba, and made freely available and accessible for years to come by naming HCA Healthcare as the custodian, the framework has clear benefits:

+ Meets Joint Commission requirements for individualized care plans with a track record of consistent approval.

+ Options for Inpatient Nursing and/or Behavioral Health projects.

+ Streamlined electronic documentation of nursing plans of care (POCs).

+ Four levels of coding support big data aggregation, dissection, and analysis.

Epic CCC Implementation at a Fraction of the Time and Cost

CereCore's clinical documentation experts have implemented the 60 major categories of the system and developed efficient, repeatable builds that reduce the time and cost for successful application of the system. Leveraging CereCore's import-ready content and back-coded elements, your CCC implementation can be completed at a fraction of the effort and cost as compared with in-house builds.
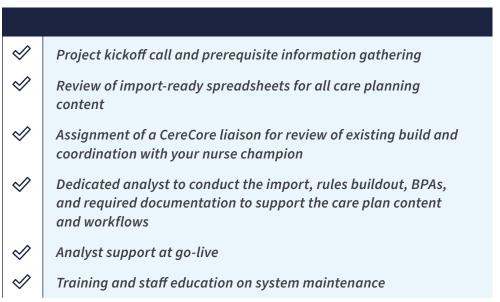

The Core Solution for CCC in Epic includes:

+ Implementation of quick, easy-to-document customized SmartForms with navigation and pre-selected goals.

+ BPAs automatically add the care plans and associated education items and allow for individualization per Joint Commission requirements.

+ Import-ready content - all elements are back-coded with CCC.

+ Behavioral Health care plans that encompass both long and short-term goals.

+ Required documentation ready for Admission/Shift.

+ End-user training and materials.

A Proven Implementation Approach for Multi-Disciplinary Care Plans

Leverage CereCore's experienced team of Epic and nursing analysts, along with a combined 200+ years of hospital experience. CereCore CCC content is live in multiple hospital and behavioral health units, with no Joint Commission findings in almost a decade of use.

Our Approach Provides You a Partner Throughout the Project, Including:

- ✓ *Project kickoff call and prerequisite information gathering*
- ✓ *Review of import-ready spreadsheets for all care planning content*
- ✓ *Assignment of a CereCore liaison for review of existing build and coordination with your nurse champion*
- ✓ *Dedicated analyst to conduct the import, rules buildout, BPAs, and required documentation to support the care plan content and workflows*
- ✓ *Analyst support at go-live*
- ✓ *Training and staff education on system maintenance*

Why Choose a Core Solution?

CereCore® has combined expertise, automation, and methodologies from years of successful health IT projects to provide time and cost-saving options to optimize your EHR, address regulatory compliance, and adopt new functionality. Core Solutions feature a fixed-fee or fixed scope delivery model to demonstrate quick return on investment and keep your health system moving forward.

Using CereCore's build of the CCC system in Epic helps you fulfill Joint Commission standards for nursing POCs at approximately *half the cost and completion time* than with in-house, ground-up efforts.
